Figma, Figma Make, Adobe Creative Suite, Github Copilot, Azure DevOps, JIRA, Supernova, Procreate, Miro.

Experience

UX Designer with 7+ years of experience in enterprise product design, specialized in Design Systems. Currently contributing to John Deere's Design System, enabling 20+ product teams through reusable components, documentation, and design-engineering collaboration, led multiple initiatives for expansion.

John Deere / Design System Designer

December 2023 - Present

- Drive Design System initiatives supporting 20+ product teams through reusable components, documentation, and engineering collaboration.
- Led the enterprise Equipment Icon System (140+ icons), defining standards, governance, and contribution workflows.
- Built scalable components, responsive patterns, and a centralized PDF Report Library to strengthen design-to-development consistency.

Accenture / UX Designer

January 2022 - December 2023

- Led end-to-end UX design of an generative underwriting platform for global insurance organizations.
- Conducted user research, workflow analysis, wireframing, and prototyping to simplify complex underwriting processes.
- Collaborated with product, business, and engineering teams to deliver solutions within agile development cycles.

TCS Interactive / UX Designer

July 2019 - December 2021

Redesigned a legacy enterprise desktop application through research-driven design, improving usability and modernizing the user experience. Collaborated closely with developers from concept to implementation to ensure successful delivery.

DRDO CAIR / Research Intern

June 2018 - December 2018

Built a detailed case study on "Traffic analysis of various social media apps". Goal was to design & code a logic, that can identify & extract application packets from traffic network.
