shreyajaindesign@gmail.com

Dear hiring team,

My name is Shreya Jain, and I bring 6 years of experience crafting user-centered digital experiences across global enterprises and product ecosystems. I am currently part of John Deere's ISG Digital Team as a UX Designer II, where I contribute to building scalable UI components and guidelines that ensure consistency across global web and mobile platforms. By collaborating closely with engineers and product teams, I help shape design system solutions that unify the brand experience, reduce design debt, and empower teams to design with speed and clarity.

At Accenture, I designed enterprise applications for global insurance clients, where my work streamlined underwriting operations and earned me the APP Pinnacle Champions Award and the Client Value Creation Award. Earlier at TCS Interactive, I redesigned legacy desktop applications and BI dashboards, establishing design system templates that improved usability and adoption.

Beyond my professional roles, I actively pursue passion projects in UX research, exploring how deeper insights into user behaviour can drive better product outcomes. This curiosity and drive to translate human needs into meaningful, scalable solutions form the core of my design philosophy.

Hence, I am eager to apply my expertise and optimise out there. If you believe we are a good match, I would love to discuss how my background and approach to design can contribute to creating impactful product experiences at your organisation. Please do not hesitate to contact me at shreyajaindesign@gmail.com

Looking forward,
Shreya Jain
